entervo eTickets
QR Codes for Smart Parking Applications

At a glance

entervo eTickets are QR codes for smart parking applications. These digital, encrypted and robust eTickets can be used instead of many of S&B's classical parking tickets, such as a multi-use pass or a voucher.

On top of that, the entervo eTickets can easily be distributed via e-mail, online or as a hard copy.

Your customers can then use them on their smart phones or on printouts. In other words, entervo eTickets provide huge flexibility and boost your customers' convenience.

Details

eTicket parking products

A wide variety of eTickets can be selected for multiple use cases:

- Single-use pass
- Multi-use pass
- Discount voucher (money, time, percentage value or tariff switch)
- Prepaid ticket, free ticket and exit ticket

eTicket distribution channels

Easy and fast solution to issue eTickets:

- Integrated e-mail distribution
- Direct use via mobile devices
- Digital bulk production of eTickets
- Seamless distribution via Office software
- Direct printing to a connected standard printer, receipt printer or as a PDF document
- eTicket layout templates can be selected, such as for mobile phones

eTicket production

eTickets can easily be produced via the entervo Cashier (SW module) offering the latest generation of a web-based point of sale. For further details please refer to our entervo Cashier data sheet.

eTicket reporting

entervo offers a comprehensive reporting to track production and usage of all eTickets. This includes a convenient link between eTicket production and tracking. Moreover the production and all kind of usages will be reported in entervo settlements and tracking.

eTicket blocking

With entervo you can easily block and unblock eTickets, if needed. This may be carried out for a single or a group of eTickets. Blocking can become useful, if e.g. an eTicket partner received eTickets but has not paid accordingly. In short, the operator remains in full control of its eTickets at all times.

Focus

- ♠ Customer convenience
- ♠ Saving costs

Benefits

- ♠ Modern alternative to traditional dispatch of parking vouchers
- ♠ Enables new online sales and marketing channels
- ♠ Digital and contactless parking medium
- ♠ Robust and safe QR code technology
- ♠ Fully auditable and fraud proof solution
- ♠ Less system maintenance (no moving parts)
